

ISO CERTIFICATION

ISO 2768-1 Certification

Document Checklist for ISO Certification

Professional assistance for ISO 2768-1 Certification (General Tolerances for Linear and Angular Dimensions in manufacturing/engineering drawings), covering eligibility review, document checklist, application preparation, filing coordination and follow-up support.

Documents Required

- Business registration/incorporation proof
- Site plan and process flow of the manufacturing unit
- Engineering drawings/technical specifications of products
- List of machinery and measuring instruments used, with calibration certificates
- Quality control/inspection process documentation
- Details of tolerance classes applied to products
- Sample product measurement/inspection records

Note: The above list indicates commonly required documents. Additional documents may be requested by the certification body during the audit process depending on the specific case. Expert Registration confirms the exact requirement after a brief consultation.
