

SOFTWARE SOLUTIONS

Security Device Planning & Implementation

Document Checklist for Software Solutions

For planning and implementing security devices/systems (CCTV, access control, cybersecurity infrastructure) for a business.

Documents Required

- Business registration/incorporation proof
- Site plan/layout of the premises where devices are to be installed
- Details of existing security infrastructure, if any
- Details of specific security requirements (physical/cyber)
- Number of locations/entry points to be covered
- Budget range and timeline for implementation

Note: The above list indicates commonly required documents/details. Additional information may be requested depending on the specific scope and technology involved. Expert Registration confirms the exact requirement after a brief consultation.
